Sorry. Please use this graphic. I made a subtle, but important, change to the direction on alternative location sampling.

I highlight where I made the change in Yellow.

Importance: High

Attached is a graphic that presents the approach/direction for current and future sampling under hard sediment conditions. We have given Julee this direction and she has conveyed this to the field crew.

John – Please let me know soonest if you see any fatal flaws with this now 2 composite sample approach for hard sediment/refusal conditions.

Thanks!
Scott

There is a technical nuance in our direction that I'm trying to confirm with John Kern, but we feel it is the correct method.

I will give you a call to explain.
